Subject: **Drone First Responder (DFR) Assists in Safe Apprehension Following Domestic Dispute**

City of Miami Police Officers were dispatched to a reported domestic-related dispute involving a boyfriend and girlfriend on November 11, 2025., during which the boyfriend allegedly shoved the victim and vandalized a window at the residence.

At the same time, the MPD Drone First Responder (DFR) unit deployed DFR 11 to the area, which successfully arrived before patrol units due to its rapid aerial response capability. As a result, DFR 11 quickly spotted the suspect attempting to leave the vicinity.

DFR 11 maintained continuous visual contact with the suspect and relayed real-time updates to responding officers. During this time, the suspect attempted to change clothing in an effort to avoid detection. However, the live video feed from the overhead drone enabled officers to remain informed of his appearance and movements throughout the incident.

This enhanced situational awareness allowed officers to approach and apprehend the suspect safely and without further incident, contributing to an effective resolution of the call.

The City of Miami Police Department continues to leverage innovative tools like the Drone First Responder program to enhance officer safety, improve response times, and better serve the community.

The suspect, **LeCurry Anthony Williams Jr., D.O.B. 08/14/2001** was arrested and charged with one count of **Battery.**

Please see the attached redacted Arrest Affidavit for more information.
